Re: Modine Manufacturing Company – Camdenton, MO  
Quarterly Report for period ending March 31, 2015  
AOC No. 99-HW-002

RCRA

Dear Ms. Kump-Mitchell:

The following is a summary report of the activities completed from January 1, 2015 through March 31, 2015 at the above referenced site. This report is being submitted as required by the Corrective Action Abatement Order on Consent, Order No. 99-HW-002 (AOC) paragraphs 91 through 94.

**Description of work completed during the quarter:**

During the reporting period, Modine had continued discussions with the facility property owner and site caretaker concerning the status of the building's heating ventilation and air conditioning (HVAC) system. Although some operational issues with the HVAC controls continued to exist during the reporting quarter, trouble shooting of the system was conducted on or about March 17 which enabled the system to be operated in a manual mode. Modine's understanding was that the HVAC system was mostly functional but that not all aspects of the system were in operation as of March 17. Despite these issues, and as communicated to MDNR, Modine's consultant CH2M HILL conducted a winter indoor air and subslab vapor sampling event during the period March 23-26, 2015.

**Summary of findings, data, etc.:**

Results of the March sampling event are expected in the second reporting quarter of 2015.

**Summary of problems or potential problems and any corrective measures implemented:**

See the discussion in the above paragraphs related to the HVAC system controls.

**Projected work for the next reporting period:**

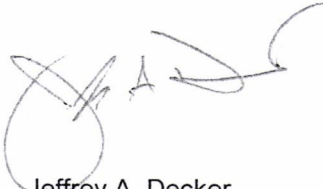

Upon receipt of the sampling results, Modine will summarize the indoor air and subslab findings in a report to MDNR. Future steps will be determined with MDNR's input based on the sampling results.

**Instances of Non-compliance with the requirements of the Order:**

There were no instances of non-compliance with the requirements of the Order during this reporting period.
